

## All Covered Procurement - Technology Lifecycle Management

### All Covered Procurement supports clients through every stage of the IT investment process.

- Expert advice to identify, procure and support the appropriate technology for your business
- World class pre-and post- sales technical support
- Competitive pricing for laptops, desktop computers, handheld devices, servers, software, printers, networking equipment and more
- Flexible purchasing options—billing, financing or leasing
- Track orders quickly and easily
- We help you dispose of the technology when it has reached its end of life
- A single partner for your technology purchases, network and on-going support needs

“Finding a technology equipment advisor that we could trust to recommend products that were right for our business, rather than most beneficial for theirs, was very important to us. And All Covered’s product-neutral approach ensures that the recommendations the company’s IT experts make are the very best solutions for our business.”

— All Covered Client

### Technology Purchasing Power for Your Business

All Covered Procurement is designed to address the technology acquisition and lifecycle challenges companies face today. All Covered offers small and medium businesses the technology advice and support of a network of experts, the purchasing strength of large enterprises by combining the buying power of its collective client base, and the flexibility to finance the purchase. This service is a natural extension to an All Covered Care support agreement because it integrates your technology needs with our core service offering.

### One Source to Recommend, Purchase, and Install

It all starts with an evaluation of your technology needs based on your business objectives. Then we recommend the appropriate solutions, help you purchase the products and then install them. Having one organization to handle the selection, purchase and installation of these products enables projects to be completed with fewer delays. There’s no more guessing if the product you bought is missing a peripheral or if the software has an inappropriate number of licenses.

### One Source to Manage and Dispose

Once your technology purchase is installed, All Covered will manage and maintain it through our proactive support services. Then, once it has reached the end of its useful life, we’ll dispose of it in a secure, environmentally-friendly manner.

### Flexible Purchasing Options

A variety of purchasing options are crucial to businesses looking to upgrade or enhance their technology infrastructure while maintaining a healthy cash flow. All Covered has partnerships with lending institutions if you prefer to finance or lease.

### Thousands of Products at Competitive Prices

All Covered has over 300,000 different products available from all the key manufacturers including Microsoft, Cisco, HP, Apple, IBM, Symantec and Dell. This breadth of availability assures we can recommend the very best technology for your specific business IT needs—not just what is in stock. Our buying power assures competitive prices and a world-class experience.

### Reduce Technology Acquisition and Management Costs

All Covered Procurement enables businesses to reduce technology acquisition costs by streamlining selection and ordering, leveraging our purchasing power, and capitalizing on our installation and management skills.
