

A Law Firm Without Strong Cybersecurity Risks Everything.

“Most law firms understand the danger [of cybercrime] and have implemented practices to prevent such intrusions, but the number of attempts keep rising.”

- Braden Perry, partner at Kennyhertz Perry, LLC.

Your law firm ignores information security concerns at its peril.

The world's most determined hackers can easily compromise companies that do not audit their information security systems and protocols, or take more proactive actions to prevent data breaches.

Cybercriminals often pay special attention to law firms, those with especially porous IT infrastructures allow hackers to gain access to the firm's IT assets and those of their clients.

Once compromised, your IT infrastructure can quickly bleed out the equivalent of billions of dollars in losses for your clients – who will certainly move on to your more reliable rivals, even as you're picking up the pieces!

In the face of growing security threats, regulators now enact stricter compliance requirements that force law firms to identify and treat risks in a transparent manner.

Bring your Cybersecurity Up to Speed.

When it comes to protecting its own internal IT assets as well as the IT assets of clients, law firms can no longer pass the buck. Allow All Covered Legal's security practice to step in, so you can take your cybersecurity architecture to where it needs to be.

Some of the services we offer include:

Cybersecurity Planning

We can assist in developing security plans based on your clients' industries, addressing attestation strategy, breach response plans, security policies, disaster recovery plans, penetration testing, and various auditory compliance tests.

Third Party Attestation.

We'll prepare your company to respond to attestation requests: allowing stakeholders to examine (and test) your security and compliance measures

ISO 27001 Consulting & ISO Certification

We'll make sure your infrastructure maps to security frameworks such as NIST or ISO27001: ensuring its conformance to the strictest of standards.

Vulnerability Assessments

Using the most robust methodologies, we will analyze your entire security infrastructure, inform of any vulnerabilities, and help remediate any issues.

Penetration Testing

We will test your security systems to protect against intrusions. If there's a security issue that can potentially open your network to a breach, we will immediately patch it.

CYBERCRIME BY THE NUMBERS:

Law Firms: #7 Top Target for Cybercrime

Cisco 2015 Annual Security Report

The average consolidated total cost for a corporation of a data breach grew from \$3.8M to \$4M in 2015. U.S. based Corporations was \$6.5M.

Study by the Ponemon Institute & IBM Findings of Marsh 2014 Global Law Firm Cyber Survey

Working with All Covered's Legal practice, you're sure to get the best possible outcomes to your security and compliance issues.
