IT SERVICES FROM KONICA MINOLTA

## ALL COVERED QUALYS VULNERABILITY MANAGEMENT

### IS YOUR QUALYS INVESTMENT DRIVING RESULTS?

#### WHERE TO BEGIN?

Vulnerability Management is one of the most effective means of proactively protecting an enterprise. By understanding where critical vulnerabilities exist, organizations can take specific measures to eliminate potential attack vectors. Unfortunately, many organizations are often challenged with vast amounts of data that is generated by ongoing scans and do not properly analyze and prioritize the large output of data from Qualys products.

Beyond the data analysis challenges, other areas like troubleshooting, operational experience, and resource availability further complicate an organization's ability to drive value and tangible results. What does all the data mean, how is it relevant, and where do you begin?

#### LET'S START WITH A HEALTH CHECK.

All Covered offers specialized services that help organizations effectively implement and manage their vulnerability management program using Qualys products. So, how can All Covered help you make sense of the data? We offer a dedicated health check that will evaluate the current environment and make detailed recommendations to improve the results. All Covered health check will:

- Interview and evaluate subject matter experts
- Identify program goals and road blocks for achieving them
- Evaluate the structure and content in the current deployment
- Revise processes and standards
- Provide a prioritized list of recommendations

### TAKING IT ONE STEP FURTHER...

All Covered also offers managed services that are designed to augment or fully support your vulnerability management program. We can provide strategic oversight, operational management and organizational updates through specialized executive and technical reporting. The following additional services will mature your program over time, ultimately yielding improved results:

- Vulnerability Assessment
- Policy Compliance (Configuration Assessment)
- Web Application Scanning
- Trending Analysis and Reporting
- API Integration
