NEW 2U

REFRESHED AND REPURPOSED

Schools are struggling to meet unprecedented demand for student devices as they work to prepare for teaching and learning strategies that will include at least some remote elements. Districts with limited budgets and aging fleets were already struggling to keep pace. All Covered has the perfect solution: **CloudReady** is a Google-compatible operating system that breathes new life into your existing PCs and Macs (up to 12 years old) at a fraction of the cost of buying new Chromebooks.

- Unparalleled speed, simplicity, and security of Chrome OS—on any hardware
- Convert legacy Windows and Mac devices so you can manage your entire fleet together, alongside your Chromebooks, using the Google Admin console
- Eliminate IT's need to re-image devices, install updates, and worry about security risks on unpatched machines
- CloudReady updates are installed automatically and seamlessly in the background, just like Chromebooks
- CloudReady machines are compatible with all US digital testing platforms that support Chrome OS, making digital testing setup quick and easy

DEPLOYMENT SERVICES

Don't worry about having to do the conversion on your own. Keep your IT professionals focused on the strategic needs of your school and leave the conversion to All Covered. A migration to CloudReady on a fleet of systems can be time consuming and challenging. All Covered's Deployment Services can make all the difference in helping to overcome those challenges and efficiently get these devices where they are needed most.

END TO END PROJECT MANAGEMENT

All Covered offers these services on a per device price which includes the CloudReady License, GMC license, Configuration Services, and Return Shipping.

For more information on refreshing your devices, please email Education@AllCovered.com
